Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

Claims 4, 5, 7, 10, 12 - 28 and 31 – 38 are allowed.

The indicated allowability of claims 29 - 30 is withdrawn in view of the newly discovered reference(s) to Ueda. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 29 – 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Ueda (US 5,631,749).

Regarding claim 29, Ueda disclose color image signal processing device for adjusting the Hue. Ueda discloses *"An object of the invention is to provide a color image signal processing device in which, when a color signal of an image for a first device is reproduced by a second device, a user can easily alter to a desired hue conversion characteristic to perform proper color reproduction from the view-point that a color matching of hue in three attributes of color takes an important role for color reproduction"* (see col. 2 lines 7 – 11). Ueda further discloses *"The graph of FIG. 3 and the table of hue values described in the hue conversion table in FIG. 4 are illustrated as ranging from 0 to 360 in both input value and output hue value..."* (see col. 6 line 65 – col. 7 line 1). Ueda processes video from a CRT display for reproduction on a printer (see col. 3 line 64 – col. 4 line 1). Ueda discloses filtering a hue signal in the range of 0 to 360 or (0 to 2 pi.) to a desired output of 0 to 360 (0 to 2 pi.). It is noted that an output of 360 would result in unfiltered offsets of 360 or 2 pi. As a result, Ueda anticipates claim 29.

Regarding claim 30, as discussed in claim 30 above, Ueda discloses the hue input value of 0 to 360 (0 to 2 pi) can be converted to an output value in the 0 to 360 range (0 to 2 pi). Ueda anticipates claim 30 in situations where an input hue of 180 (pi) can be converted to 360 (2 pi) thus adding unfiltered offsets in the range of 180 to 360 when converting from 180 to 360.
